©2012 FreeSilverGuide.com. All figures are in US dollars. The above is presented as a guide only and should not be used solely when making a purchase or sale of any kind. Precious metals, including silver, are weighed in Troy ounces. Do not use a "regular" scale to measure Troy weight. Troy oz weight = .912 x "regular" ounce weight. An Oz/g conversion of .0321507466 is assumed. Melt value includes only that of silver content and does not take into account values of other metals contained in any given coin, minting variances, coin wear, and/or refining or any other associated costs. Many coins have collector (numismatic) value that exceed these melt estimates. No expressed or implied guarantee is made as to the accuracy of this data.
